To Whom It May Concern:

This letter is written in regards to patient Suzanne Lewis Brown (date of birth [REDACTED]). Suzanne is a patient of mine having undergone total knee arthroplasty earlier this year. As a result of debilitating arthritis affecting her legs, she has permanent ambulatory disabilities.

In order to access her residence, she requires a flat surface as close as possible to her main door for safe mobility. In her particular circumstance, I do not feel that a lift or ramp would be suitable from the rear of the house, because the patient would require a lengthy walk down a potentially unsafe walkway during cold weather, with limited exposure to the sun.

If there are any questions regarding her condition, please feel free to contact my office

Sincerely
